A System of Anatomical Plates of the Human Body; Accompanied with Descriptions, and Physiological, Pathological & Surgical Observations Volume 1 John Lizars

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1823 edition. Excerpt: ...thirds of its course, and from the dismemberment of important muscles that would necessarily result, in cutting down to the vessel when wounded, it appears preferable to apply compression to the artery, and to throw a ligature around the superficial femoral artery. VVheu wounded in the distal third of the limb, the patient should be placed on his face, and the toes turned neither tibiad nor fibulad, but distad, to relax the muscles; an incision is then to be made in the centre between the tibial edge of the gastrocnemius muscle, or rather the tendo-achillis r, r, Plate XIX., and the tibial angle q, q of the tibia, through the skin and cellular substance, the second incision cautiously cutting through the fascia, investing the muscles and vessels; the artery will now be distinctly felt pulsating, and should be separated from its concomitant veins and the posterior tibial nerve 22, which generally lies on its fibular side, either with the scalpel, its handle, or the nail of the finger, or the aneurismal needle, the latter of which ought to be introduced from the fibular aspect, between the nerve and artery, leaving out, however, the vena: comites, and brought out at the tibial aspect. Should the surgeon deem it prudent to cut down for the artery in the two proximal thirds of the limb, the position of the patient must be the same, but the measurement must he between the same angle where the artery divides into the internal or tibial plantar c, and the external or fibular plantar a branches, both of which are observed to run beneath the abductor pollicis muscle B; theinternal c proceeding along its fibular margin, and dividing into several small branches, which extend to the great toe, the index, and the flexor brevis cligitorum c, supplying...

We recommend you for having this kind of A System of Anatomical Plates of the Human Body; Accompanied with Descriptions, and Physiological, Pathological & Surgical Observations Volume 1 instantly.

Carlee Smith:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's heart and soul or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that looking at is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this A System of Anatomical Plates of the Human Body; Accompanied with Descriptions, and Physiological, Pathological & Surgical Observations Volume 1 can make you experience more interested to read.

Alta Favors:

Reading a guide make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is prepared or printed or created from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for anyone. From media social including newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search of the A System of Anatomical Plates of the Human Body; Accompanied with Descriptions, and Physiological, Pathological & Surgical Observations Volume 1 when you necessary it?
