Eye-Opening Techniques Shed New Light on Open Source Intelligence Collection and Analysis

Author Michael Bazzell has been well known and respected in government circles for his ability to locate personal information about any target through Open Source Intelligence (OSINT). In this book, he shares his methods in great detail. Each step of his process is explained throughout fifteen chapters of specialized websites, application programming interfaces, and software solutions. Over 200 resources are identified with narrative tutorials and screen captures.

This book will serve as a reference guide for anyone that is responsible for the collection of online content. It is written in a hands-on style that encourages the reader to execute the tutorials as they go. The search techniques offered will inspire analysts to "think outside the box" when scouring the internet for personal information.

Much of the content of this book has never been discussed in any publication. Always thinking like a hacker, the author has identified new ways to use various technologies for an unintended purpose. This book will improve anyone's online investigative skills. Among other techniques, you will learn how to:

- Search The Twitter API for GPS data
- Locate "hidden" Myspace content
- Use search operators to increase results
- Generate maps of video media by location
- Search multiple networks for people
- Monitor all network traffic for keywords
- Create API calls to get instant information
- Properly extract content from websites
- Create replicas of an entire website
- Locate deleted and previous versions of websites
- Search past archives of online classifieds data
- Locate all user profiles by searching user names
- Obtain user created documents, photos, & videos
- Analyze digital photograph metadata for information
- Conduct reverse image searches to identify aliases
- Use software applications to automate searching
- Locate additional information about website owners

Create personal web forms for API searching
