The Insanity of Man and Reality of the Gods Christopher J Costanza

Please be advised: This book can be offensive on several different levels. Reading this book requires an open mind and readiness to except facts over personal beliefs. It heavily delves into politics and religion to present evidence of manipulation. A psychological evaluation of mankind's nonsensical beliefs. It discusses the fact that corrupted religion, history, and government is used to manipulate countless people and has caused the majority to become close minded. Our very lives seem to be specifically designed to produce citizens who believe the absurd over scientific fact and logic. So many seem to develop ironclad beliefs without studying all the evidence available, which directly endangers our mental and technological evolution and allows for ease of manipulation. It has even allowed big business to irreversibly harm the planet in the name of profit and personal power. This same close mindedness and manipulation has resulted in the majority refusing to hear all the astounding evidence provided regarding the ancient astronaut theory. I discuss these issues and some of the main evidence surrounding the ancient astronaut theory as documented by religious texts. I argue that religions have so obviously mistaken physical beings with advanced technology as "gods". I also argue the point that these findings in no way disprove the existence of a "god", only that religious texts were written by men who did not understand what they had witnessed. I truly do my best to keep an open mind and explore all possibilities, even though they may not coincide with my personal opinions. I use the study of human behavior to argue that the descriptions of "gods" and their heavenly vehicles by ancient men mimic the behavior of humans perfectly. I point out the fact that human technology is quickly approaching our idea "god". In a sense, proving that if these collective accounts of the "gods" are in fact true, they are not describing supernatural beings but physical ones using technology, advanced knowledge, and philosophies to guide mankind. My main goal is argue these points without presenting wild theories, and extremely questionable evidence that the majority of authors use. My belief is that most books regarding this subject actually do more to discredit the theory than promote it in a logical and simplistic way that cannot be argued. This book features compelling information regarding the Sumerian epics, ancient India's Sanskrit texts, and the Bible, which in my opinion provide the most inarguable evidence in the field.
