Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

The Definitive Resource on Text Mining Theory and Applications from Foremost Researchers in the Field

Giving a broad perspective of the field from numerous vantage points, **Text Mining: Classification, Clustering, and Applications** focuses on statistical methods for text mining and analysis. It examines methods to automatically cluster and classify text documents and applies these methods in a variety of areas, including adaptive information filtering, information distillation, and text search.

The book begins with chapters on the classification of documents into predefined categories. It presents state-of-the-art algorithms and their use in practice. The next chapters describe novel methods for clustering documents into groups that are not predefined. These methods seek to automatically determine topical structures that may exist in a document corpus. The book concludes by discussing various text mining applications that have significant implications for future research and industrial use.

There is no doubt that text mining will continue to play a critical role in the development of future information systems and advances in research will be instrumental to their success. This book captures the technical depth and immense practical potential of text mining, guiding readers to a sound appreciation of this burgeoning field.

From reader reviews:

Gabriel Cleveland:

What do you concentrate on book? It is just for students because they are still students or the item for all people in the world, what best subject for that? Only you can be answered for that question above. Every person has diverse personality and hobby per other. Don't to be forced someone or something that they don't desire do that. You must know how great and also important the book Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). All type of book would you see on many sources. You can look for the internet solutions or other social media.

Danny Johnson:

Book is to be different for every single grade. Book for children till adult are different content. We all know that that book is very important for all of us. The book Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) was making you to know about other information and of course you can take more information. It is quite advantages for you. The guide Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is not only giving you much more new information but also to get your friend when you really feel bored. You can spend your current spend time to read your reserve. Try to make relationship with the book Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). You never really feel lose out for everything in the event you read some books.

Ann Macdonald:

The e-book with title Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) has lot of information that you can find out it. You can get a lot of help after read this book. This book exist new understanding the information that exist in this publication represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This specific book will bring you inside new era of the glowbal growth.
