Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences

Jonathon D. Brown

Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences

Jonathon D. Brown

Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences Jonathon D. Brown

This textbook is an approachable introduction to statistical analysis using matrix algebra. Prior knowledge of matrix algebra is not necessary. Advanced topics are easy to follow through analyses that were performed on an open-source spreadsheet using a few built-in functions. These topics include ordinary linear regression, as well as maximum likelihood estimation, matrix decompositions, nonparametric smoothers and penalized cubic splines. Each data set **(1)** contains a limited number of observations to encourage readers to do the calculations themselves, and **(2)** tells a coherent story based on statistical significance and confidence intervals. In this way, students will learn how the numbers were generated and how they can be used to make cogent arguments about everyday matters. This textbook is designed for use in upper level undergraduate courses or first year graduate courses.

The first chapter introduces students to linear equations, then covers matrix algebra, focusing on three essential operations: sum of squares, the determinant, and the inverse. These operations are explained in everyday language, and their calculations are demonstrated using concrete examples. The remaining chapters build on these operations, progressing from simple linear regression to mediational models with bootstrapped standard errors.

From reader reviews:

Karl Schueller:

The book Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences can give more knowledge and information about everything you want. Exactly why must we leave the good thing like a book Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences? A number of you have a different opinion about publication. But one aim that will book can give many info for us. It is absolutely correct. Right now, try to closer using your book. Knowledge or data that you take for that, you may give for each other; you are able to share all of these. Book Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences has simple shape nevertheless, you know: it has great and big function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

Ellis Cook:

Information is provisions for anyone to get better life, information nowadays can get by anyone at everywhere. The information can be a know-how or any news even a concern. What people must be consider any time those information which is inside the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information we will see huge disadvantage for you. All of those possibilities will not happen within you if you take Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences as your daily resource information.

Frank Anderson:

Hey guys, do you wants to finds a new book to see? May be the book with the headline Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences suitable to you? The actual book was written by popular writer in this era. The particular book untitled Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciencesis the one of several books which everyone read now. That book was inspired a number of people in the world. When you read this reserve you will enter the new age that you ever know just before. The author explained their thought in the simple way, therefore all of people can easily to know the core of this e-book. This book will give you a lots of information about this world now. To help you see the represented of the world on this book.

Andy McNeil:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from your book. Book is published or printed or illustrated from each source in which filled update of news. With this modern era like today, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Linear Models in Matrix Form: A Hands-On Approach for the Behavioral Sciences

when you necessary it?
