## Human Respiratory Viral Infections

Using a multidisciplinary approach, **Human Respiratory Viral Infections** is set at the level between the definitive reference work and an essential clinical manual. Exploring recent advances in human respiratory viral research, the text builds on the basic sciences of epidemiology, virology, molecular biology, and immunology to cover clinical diagnosis, mechanism of pathogenesis, manifestations of disease, impact, treatment, and management strategies.

- Provides a comprehensive review of all the major human respiratory viral infections
- Supplies a detailed description of the anatomy of the respiratory system
- Discusses the salient features of specific viruses
- Examines the latest diagnostic tools
- Covers risk factors associated with incidence of respiratory viral infections in children and adults in different occupational and environmental settings

Presenting the latest knowledge in human respiratory viral infections, this text will be immensely valuable for pulmonologists, biomedical scientists, research scholars, virologists, vaccinologists, immunologists, clinicians, pharmacologists, and public health specialists.
